Election/Restrictions

Claims in the application are 1-15.

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of
5 inventions which are not so linked as to form a single general
inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply
to this action, to elect a single invention to which the claims must
be restricted.

10 Group I, claim(s) 1-14, drawn to a method of preparing crosslinked
enzyme aggregates comprising an enzyme activity-enhancing agent
interacting with enzyme molecules.

15 Group II, claim(s) 15, drawn to crosslinked enzyme aggregates
comprising an enzyme activity-enhancing agent associated therewith.

The inventions listed as Groups I and II do not relate to a single
general inventive concept under PCT Rule 13.1 because, under PCT Rule
13.2, they lack the same or corresponding special technical features
20 for the following reasons: the special technical feature of invention
I is a method of preparing crosslinked enzyme aggregates and the
special technical feature of invention II is crosslinked enzyme
aggregates. Invention I does not require the special technical
feature of invention II, and the converse. The method of invention I
25 can produce crosslinked enzyme aggregates different than encompassed
by invention II since the enhancing agent of invention II can be
admixed with already formed aggregates. The aggregates of invention
II can be made by a different method than required by invention I.
For example, the invention II aggregates can be produced by
30 aggregating with the crosslinking agent without using a precipitating
agent as in the invention II method.

Applicant is advised that the reply to this requirement to be
complete must include (i) an election of a species or invention to be
35 examined even though the requirement be traversed (37 CFR 1.143) and
(ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election
5 shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that
10 this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a
15 non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR
20 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David M. Naff whose telephone number is 571-272-0920. The examiner can normally be reached on Monday-Friday 9:30-6:00.
